

Great news for children and wildlife enthusiasts!

During lock down, The Kruger National Park in South Africa is doing 2 safari drives a day, which you can watch *live* on YouTube. Morning drive is 5.30-8.30am and afternoon drive is 3.30-6.30pm.

It's very interesting and informative, and questions pop up and are answered by the game rangers.

They've discovered a hyena who has 3/4-day old pups which they check on each drive. It's really lovely to watch.
