## Awakened Citizen Programme (2022-23)

Awakening Citizen Programme focuses on developing the universal and unique possibilities present in each and every child. "The infinite strength and potential inherent in every child can be manifested as wonderful possibilities in every walk of life." This definition of education by Swami Vivekanand is the basis of Awakened Citizen Programme. The entire emphasis of this programme is to bring about a transformation in the student's attitude from 'should' to 'could' and to help each and every child inculcate moral values in his/her behaviour. ACP stresses on providing an atmosphere of motivation and encouragement in the classroom wherein the inherent qualities of the child can be brought in the forefront. The focus of ACP is to develop ideal and responsible citizens for the country.

- ACP is a three-year graded program which can be implemented for classes 6, 7 & 8.
- The first year of this program consists of 16 modules, where each module is of minimum 45 mins dealing with developing the qualities like being heroic, developing faith, living in harmony, seeking perfection, developing shradha, being a truth seeker etc.
- ACP is implemented in the classroom by showcasing various sessions dealing with various qualities which can be inculcated in a child. Various modules are showcased in the classroom and the students are encouraged to respond to the various situations presented in the module. The session concludes by the teacher disclosing the quality which the module intends to convey.
