

Bal Bharati Public School, Navi Mumbai

BEST PRACTICES IN SCHOOL

The real development of a student is only possible when the school puts emphasis on the holistic education which engages all aspects of the learner including mind, body and spirit. It transforms the thinking abilities and helps the learner to have a positive social behaviour. It not only fulfills the academic requirements of a learner but also teaches to acquire the right methods to face the challenges of life.

Bal Bharati Public School, Navi Mumbai has always used innovative ideas to use best practices for the all-round growth of the students. The following are some of the often-adopted practices.

1. Book Donation Drive: The student council conducts the book donation drive in which the books that are in good condition are collected and donated to NGOs to help underprivileged children. The students and parents eagerly participate in this charitable act. It helps the students to learn the value of sharing things with others.

2. Go Green and Gift Green: The school has taken initiative to add more greenery to our planet earth and hence save the environment. The school believes in going green by planting trees and hence started gifting potted plants which makes the receiver and the giver both gleeful and glad.

3. Reduce, Reuse and Recycle: The school urges the students to stop using plastic bags as it causes so much harm to the environment. The students are encouraged to use the bags that can be reused and curb the waste of resources. Reducing paper wastage is also encouraged among all functionaries.

4. Save Electricity, Save Power: The students are taught to consciously save power for more power. This helps the students to switch off the lights and fans of their classrooms, when not in use. They learn the value of precious resources that should be preserved and not wasted.

5. Shramdaan: The students are time and again reminded the value of cleanliness and how to keep their classrooms and surroundings clean. One of the activities of Shramdaan is to keep the surroundings clean by putting efforts. Students are encouraged to pick the pebbles and stones from the school fields. They enjoy doing it together as a team and that helps them to realise the value team work.

6. Encourage Communication in English: The students are encouraged to speak in English for better command over English language. To motivate them, the school, at regular intervals present badges to two best speakers of every class who often communicate in English. This inspires the other students to aim for those badges.

7. Each Day is a Celebration: The students get to know the important national and international days of the world through colourful and attractive templates prepared by the staff and posted in all class groups to make the students aware of the importance of various events, people and other meaningful features of our lives.
