

Bal Bharati Public School Navi Mumbai

INNOVATIVE WAY OF TEACHING IN CLASS ROOM

It's a joy seeing the smile on the child's face as they learn.

Students learn the best when they're given a chance to rest their brains for a while during the school hour. The purpose is to refocus students and prevent mental burnout. Keeping that in mind the Mathematics teachers of Bal Bharati Public School, Navi Mumbai introduces various fulfilled activities to promote meaningful and joyful learning in the class. Few of those are activities like *Math toon* and *Mathematical comic strip* for classes' 3rd, 4th and 5th respectively.

Comics is a medium used to express ideas with images, mostly combined with text or other visual information often with a punch line to display a humour or narrative.

Mathematical comic strip = Math + Comics = Joyful Learning

It reinforces in students' different Math skill like multiplication, division, fractions, decimals, measurement, geometry etc in a fun way.

Similarly students created Mathtoon by drawing cartoons using numbers, shapes and mathematical symbols.

Math toon = Math + Cartoons = Joyful Learning

After completion of different topics in mathematics class these activities are held on a regular basis. After performing such activities, children are always with a smile, lots of positive energy and a better emotional state of mind. It also integrates Mathematics with Art.
