SUMMER HOLIDAY HOMEWORK 2023-24

CLASS 8

MATHEMATICS

Symmetry:

On an A4 sized tinted or chart paper, create a symmetrical design using millets. Symmetry is an important concept in mathematics and art. You can create a symmetrical design by dividing a shape into two or more equal parts and then reflecting one part across a line or a point. Use millets of different colors and sizes to create an interesting pattern using glue.

Place the paper in a transparent sheet and then File it with a cover page with your Name, Class Section, Subject and Topic written on it.

Write the names of the millets used.

SCIENCE

“Millet is a tiny wonder grain with big health benefits.”

Make a chart with colorful pictures and information.

Topic : “ Millet”

You can include the following information .

- The requirements for growing Millet like soil, climatic conditions, irrigation.
- Varieties of Millets.
- Health benefits.
- Advantages of Millet production.
- States which are the largest producer of Millet.

SOCIAL SCIENCE

In the political map of India highlight the states where different millets are grown. You should stick the different coarse grains on the states where they are cultivated.

Instructions:

- Political map of India to be pasted on a hard board/ cardboard for support.
- Stick different grains in the states where they are produced.
- A State may produce 2 or more coarse grains. Likewise, a State may not be a major producer of any coarse grain.
