2 INTERCUT PHONE CONVERSATION**2**

Black Widow: I have been rummaging the whole storage for an hour and there's absolutely no evidence of the chemicals here.

Yelena: Keep searching, if we don't find it taskmaster will.

Black Widow: Taskmaster already has the formulas, if he gets his hand on this chemical we are doomed.

Yelena: Are any of your avenger friends available?

Black Widow: We can't most of us are on the run. If Agent Ross gets notified about are location we need to go into hiding again.

Yelena : Perfect timing.

Black Widow : Brief me about this chemical once again.

Yelena : Dray and the Taskmaster have all these girls under their influence and they are trained to become killers or widows and then they go to these missions to kill high profile people. If they refuse to do it he eliminates them by his controller. Every widow has a chip installed in them including myself.

These chips won't work if we have the chemicals. With the help of the chemicals we can release all the girls from his influence.

Black Widow: Found It!!

Yelena: I am sending you my hiding location get there as soon as possible.

End Call.
