

## Bal Bharati Public School, Navi Mumbai

(A constituent unit of Child Education Society (Regd.) New Delhi)

Plot No. 5, Sector 4, Kharghar, Navi Mumbai – 410210.

### Report on Learning Centres

At Bal Bharati Public School, Navi Mumbai we recognize the pivotal role that learning centres play in the early development of our students, especially those in Nursery, Pre-School, and Pre-Primary classes. These interactive spaces are designed to foster creativity, critical thinking, social interaction, and cognitive growth through hands-on learning experiences. The learning centres include diverse areas such as the library corner, art and craft corner, block play, dramatic play, home centre, and language and mathematical corners, each serving a unique purpose in the holistic development of children.

Each and every centre possesses its own importance in the learning process of the children. The Library Corner is an essential space for nurturing a love for reading and storytelling. It provides students with access to age-appropriate books that stimulate their imagination and curiosity. The Art and Craft Corner is a creative space where children express themselves through various forms of art, including drawing, painting, colouring, and crafting. The Block Play area supports the development of spatial awareness, hand-eye coordination, and logical thinking. By manipulating blocks and creating structures, children learn about shapes, sizes, balance, and symmetry. The Dramatic Play area, also known as role play, allows children to engage in imaginative scenarios, such as playing house, pretending to be doctors, or enacting stories. The Home Centre allows children to engage in real-life activities like cooking, cleaning, and organizing. This area teaches children about daily life routines, helps them develop a sense of responsibility and enhances their understanding of family roles.

The learning centres at Bal Bharati Public School play a significant role in developing critical early childhood skills, including language, mathematics, social interaction, and creativity. By providing children with opportunities to explore different learning styles and engage in a wide range of activities, we ensure that they are well-equipped for future academic success and personal growth.

The thoughtful integration of these learning centres into our curriculum ensures that each child is supported in their developmental journey, fostering a love of learning from the very beginning.
